Monthly Indicators

April 2016

The housing market is being predictable, and that's a good thing. At the beginning of the year, it was anticipated that the prevailing trends of the past year would continue into and through 2016, and that has largely been the case. The number of homes for sale has generally remained lower compared to a year ago, and prices have been steadily rising in desirable communities where homes show well.

Closed Sales decreased 7.5 percent for Detached homes and 13.3 percent for Attached homes. Pending Sales increased 6.7 percent for Detached homes and 10.1 percent for Attached homes.

The Median Sales Price was up 7.2 percent to \$635,000 for Detached homes and 6.1 percent to \$392,500 for Attached homes. Days on Market decreased 19.0 percent for Detached homes and 25.7 percent for Attached homes. Supply decreased 21.2 percent for Detached homes and 40.0 percent for Attached homes.

There have been no striking changes to curtail what should be a decent run of home sales over the next several months. Mortgage rates have remained stubbornly and wonderfully low, the unemployment rate has remained at or near 5.0 percent for eight straight months and wages have increased for a great many people. New construction has been slow, and that may be a damper on sales, but the general outlook remains strong.
